- **Power Supply** : 220V AC, 50 Hz
- **Input Signal** : NPN/PNP Proximity Sensor, Solid state device, Potential free contacts, Mechanical switch, Micro-switch or Limit switch.

STANDARD FEATURES

- **Counter Display** : The display shows the current count value of the machine.
- **Set Point Control** : You can set the required count value in the counter display and the machine will stop upon reaching that value.
- **Auto Reset Feature** : Set a time limit in seconds for automatic resetting of the counter after it reaches its set value, eliminating the need for manual intervention after each cycle.
- **Memory** : Counts are saved in memory during power failures and resumed from the saved point upon power restoration.
- **Counting After Stop Command** : Even after the machine is instructed to stop, our counter continues to count. As the machine gradually decelerates, any counts occurring during this period are also recorded and displayed on the counter.

- **Reset Option** : The counter offers two reset options, accessible via either the front button or the back terminals. Additionally, you can connect an external button to the back terminals, enabling remote reset capability for added convenience and flexibility.

PREMIUM FEATURES OFFERED ONLY BY ACXA

- **SENSOR Short Circuit Protection** : Safeguards the counter if the sensor's positive and negative wires are shorted by any cause, preventing unnecessary repairs or replacements.

ACXA BENEFITS

**Say Goodbye to Expensive and Inaccurate Counters.
Switch to ACXA for :**

- Accurate and precise counting.
